

Summer Internship – Environmental Health & Safety

This position is located in Winamac, Indiana

We are currently seeking students who have completed at least their second year of training in Environmental Health, Safety Engineering, Occupational Health, or similar degree.

The scope of this internship includes:

The summer intern project will lead a new lockout/tagout program. They will create machine specific procedures that will include photo identifications of specific lockout points. A second project will be assisting in enhancing our confined space program.

The ideal candidate will be in at least their second year of schooling and in pursuit of his/her degree in a field relevant to EHS, and have relevant coursework and/or experience. In addition, the candidate will have the ability to prioritize multiple projects, be enthusiastic, cooperative and have positive behavior. Candidates must possess strong initiative and be results oriented. Excellent written and verbal communication skills are essential.

BraunAbility internships are paid assignments lasting 10-12 weeks.

Interns at BraunAbility are considered to be an integral part of the EHS team and work side by side with full time professionals to gain experience in the field. Those demonstrating a high level of performance will be considered for future employment as entry-level positions become available.

BraunAbility is an equal opportunity employer.
