

# Summer Internship –Electrical Engineer

---

This position is located in Winamac, Indiana

*We are currently seeking students who have completed at least their second year of training in Electrical Engineering.*

***The scope of this internship includes:***

Research and develop documentation method for detailing all aspects of design. Creating a document template to use to record and explain operational functionality and design limits for electronic circuit board designs at BraunAbility. After creating the document, they will use it to populate functionality of current designs.

The ideal candidate will be in at least their second year of schooling and in pursuit of his/her degree in Electrical Engineering, and have relevant coursework and/or experience. In addition, the candidate will have the ability to prioritize multiple projects, be enthusiastic, cooperative and have positive behavior. Candidates must possess strong initiative and be results oriented. Excellent written and verbal communication skills are essential.

**BraunAbility internships are paid assignments lasting 10-12 weeks.**

Engineering Interns at BraunAbility are considered to be an integral part of the Engineering staff and work side by side with full time engineers to gain experience in the field. Those demonstrating a high level of performance will be considered for future employment as entry-level positions become available.

BraunAbility is an equal opportunity employer.
